Subject: August Bi-Weekly Calls with Kell Kelly

Hi Alexis and Deborah,

Here is a brief summary of our August bi-weekly calls with Kell Kelly. Silvina Fonseca joined Kell on both of the August calls.

August 10

Kell had questions about a Federal Register Notice of an AOC settlement with a developer at the MEW site. We gave him the background and discussed some of the specific circumstances (the subject properties need response actions before houses are built to address high subsurface TCE vapor levels that would otherwise pose an unacceptable VI threat in the planned residences).

Enrique updated Kell on our ongoing discussions with key stakeholders regarding the possible deferral of the Anaconda site. He mentioned the recent press release from the Great Basin Watch group on the matter.

Enrique and Kell also discussed our upcoming plans to engage ARC with regard to ARC's concerns about the Leviathan Mine Site.

August 24

We discussed with Kell the cancellation of the brownfields event that had been planned for the prior week in Eureka, California.

Silvina gave us a heads up on possible upcoming press interest in lead smelter sites and HQ release of some related information by the end of August.

Enrique updated Kell on the productive teleconference with ARC representatives that occurred on 8/23.

Enrique highlighted the latest developments on Anaconda, including the Yerington Paiute Tribe's lawsuit in tribal court against ARC.

Please let Enrique or me know if have questions or if you would like additional information on any of these discussions/matters.

Thanks,

John

John Lyons
